GEODERMA

Contents Volume 72, 1996

Publisher's Note v

Research Papers

Soil development on moraines of Mendenhall Glacier, southeast Alaska. 1. The moraines and soil morphology
E.B. Alexander and R. Burt 1

Soil development on moraines of Mendenhall Glacier, southeast Alaska. 2. Chemical transformations and soil micromorphology
R. Burt and E.B. Alexander 19

Phosphate adsorption by clays from Brazilian Oxisols: relationships with specific surface area and mineralogy
M.P.F. Fontes and S.B. Weed 37

Soil to plant transfer of radioactive cesium and its relation to soil and plant properties
V. Skarlou, E.P. Papanicolaou and C. Nobeli 53

Provenance of quartz in sedimentary mantles and laterites overlying bedrock in West Africa: evidence from oxygen isotopes
C. Mizota, K. Faure and M. Yamamoto 65

Iterative solution of a stochastic differential equation: an efficient method for simulating soil variability
R. Zhang and J. Yang 75

Root distribution and seasonal water status in weathered granitic bedrock under chaparral
P.D. Sternberg, M.A. Anderson, R.C. Graham, J.L. Beyers and K.R. Tice 89

Mapping soil depth classes in dry Mediterranean areas using terrain attributes derived from a digital elevation model
M. Boer, G. Del Barrio and J. Puigdefábregas 99

Soil chemical properties of a toposequence under primary rain forest in the Itacoatiara vicinity (Amazonas, Brazil)
J. Botschek, J. Ferraz, M. Jahnel and A. Skowronek 119

Molecular characterization of soil organic matter in Pleistocene moraines from the Bolivian Andes
P. Leinweber, E. Jordan and H.-R. Schulten 133

Characteristics and methanogenesis of the Balandra lagoon mangrove soils, Baja California Sur, Mexico
L. Giani, Y. Bashan, G. Holguin and A. Strangmann 149

Book Reviews 161

Discussion Paper and Comments

A theoretical framework for land evaluation
D.G. Rossiter 165

Discussion and author's reply 191

Research Papers

Use of environmental isotopes for field study of water infiltration in the ploughed soil layer
P. Curmi, P. Mérot, J. Roger-Estrade and J. Caneill 203

Regional patterns of well drained upland soil differentiation in the middle Caquetá basin of Colombian Amazonia
J.M. Lips and J.F. Duivenvoorden 219

Effects of land use on the amino acid composition of soils: 1. Manured and unmanured soils from the Broadbalk continuous wheat experiment, Rothamsted, England
J. Beavis and C.J.B. Mott 259

Pore networks in an Italian Vertisol: quantitative characterisation by two dimensional image analysis
B. Velde, E. Moreau and F. Terribile 271

Announcement 287
